PROFESSIONAL SUMMARY

AI & Data Science undergraduate with **3 internships** in Machine Learning Engineering, Prompt Engineering, and IT Automation. Delivers production-grade **ML pipelines**, **LLM-powered applications**, and **RAG systems** using Python, FastAPI, LangChain, and cloud platforms (AWS, Azure, GCP). Certified **Microsoft Azure Developer Associate** and **AWS Cloud Practitioner**; proficient in Docker, PostgreSQL, and REST API design across full-stack deployments.

EDUCATION

Pranveer Singh Institute of Technology

Bachelor of Technology in Artificial Intelligence & Data Science

Kanpur, India

Dec 2022 – Jul 2026

- **CGPA:** 7.68/10 (~3.5/4.0 GPA) **Relevant Coursework:** Machine Learning, Deep Learning, NLP, Data Structures & Algorithms, Cloud Computing, Computer Vision, Database Management Systems

TECHNICAL SKILLS

Languages & Tools: Python, JavaScript, SQL, HTML5, CSS3, Git, GitHub, PostgreSQL, REST APIs, Postman, VS Code, Jupyter Notebook
Frameworks & AI/ML: FastAPI, Flask, React, LangChain, scikit-learn, XGBoost, Pandas, NumPy, Bootstrap | LLMs, RAG, Hugging Face, Prompt Engineering, NLP, Computer Vision, Generative AI, Semantic Segmentation
Cloud & DevOps: AWS (Cloud Practitioner), Microsoft Azure (Developer Associate), Google Cloud Platform, Docker

EXPERIENCE

Machine Learning Intern – ExoHabitAI | Live | GitHub | Video Demo

Remote

Infosys Springboard

Feb 2026 – Mar 2026

- Engineered an end-to-end ML pipeline on **39,386 NASA Exoplanet Archive records** (289 features), applying physics-based imputation (Stefan-Boltzmann Law, Mass-Radius Relations) to recover **85% of missing values** and yield a clean **6,107-record** training corpus with zero information loss.
- Designed **8 astrophysics-grounded features** (ESI, Habitability Score Index, Stellar Compatibility Index); trained **XGBoost** and **Random Forest** classifiers to **97% accuracy** and **ROC-AUC 0.9969** via 5-fold stratified cross-validation and GridSearchCV hyperparameter optimization.
- Shipped a production habitability prediction platform (Flask REST API + Bootstrap/JS) on **Render**, serving real-time probability scores to **100+ active users** post-launch ([Live Demo](#)).

Information Technology Intern | Completion Certificate | Recognition Letter

Remote

Encrypta IN

Apr 2025 – Jun 2025

- Authored Python file-handling and automation modules for **Encrypta Applications** R&D, streamlining **5+ workflows**, cutting bug-resolution time by **30%**, and expanding unit-test coverage from **60% to 85%**, reducing production defects by **40%**.
- Conducted infrastructure security audits identifying **3 critical vulnerabilities**; delivered remediation proposals adopted within **2 weeks**, strengthening cybersecurity posture and compliance readiness.

Prompt Engineering Intern | Completion Certificate | Recommendation Letter

Remote

Future Interns

Mar 2025

- Formulated **structured prompt frameworks** for SEO-optimized content generation across **4 verticals** (blog posts, product descriptions, ad copy, email campaigns), improving LLM output relevance by **~35%** and cutting revision cycles from 3 to 1 per deliverable.
- Launched an **AI-integrated website** via Wix AI, Webflow AI, and Zapier automation, accumulating **500+ user sessions** in the first month through personalized interactions and AI-driven design suggestions.

PROJECTS

MailForge | Python, LLaMA 3, LangChain, FastAPI, ChromaDB, Groq API | Live | GitHub

Jan 2026 – Feb 2026

- Architected an LLM-powered cold-email generator using **LLaMA 3** to scrape **50+ live job postings**, extract role requirements, and retrieve matches from a **ChromaDB** vector store (**30+ portfolio entries**) for fully personalized outreach.
- Implemented a **RAG pipeline** enabling context-aware email generation across **10+ domains** with zero prompt re-engineering; connected FastAPI backend (Render) with React frontend (Vercel) in a production full-stack pipeline.
- Accelerated LLM inference via **Groq API** to achieve **sub-3-second** end-to-end generation – **4× faster** than equivalent GPT-4 API calls – live on [Render](#) + [Vercel](#).

Recallio | Python, FastAPI, SM-2 Algorithm, NLP, React, PostgreSQL | Live | GitHub

Dec 2025 – Jan 2026

- Spearheaded an AI spaced-repetition platform using the **SM-2 algorithm** to dynamically schedule review intervals per recall performance, boosting long-term retention by an estimated **40%** versus static flashcard tools.
- Integrated **NLP-based auto-flashcard generation** to extract key concepts from inputs up to **5,000 tokens**, cutting manual card-creation time by **70%** across any subject domain.
- Deployed FastAPI (Render) + React (Vercel) with **PostgreSQL**-backed analytics supporting **200+ personalized learning sessions**, streak tracking, and deck management ([API](#) | [Frontend](#)).

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate (Feb 2024) | **AWS Cloud Practitioner Essentials** – AWS (Mar 2025)
Associate Cloud Engineer Journey – Google Cloud/Coursera (Sep 2025) | **GenAI: LLMs & Hugging Face** – Cuvette Tech (May 2025)
Semantic Segmentation with Amazon SageMaker – Coursera Project Network (Sep 2024)

ACHIEVEMENTS & ACTIVITIES

Adobe India Hackathon – Cleared Round 1 (MCQ + Coding) among **1,000+ participants**, Pranveer Singh Institute of Technology
Software Engineering Simulation – Hewlett Packard Enterprise/Forage (Mar 2025): Delivered RESTful APIs, unit-test suites, and data-upload services in a simulated Agile sprint
Cybersecurity Simulation – Mastercard/Forage (Mar 2025): Designed and analyzed phishing scenarios, presenting risk-reduction recommendations to a mock security board
